About Me

Senior Software Engineer with 8+ years of experience designing and building scalable backend systems and highavailability architectures within the fintech domain. Specialized in microservices and event-driven systems, with a strong track record of delivering reliable, highperformance platforms supporting large-scale financial operations. Proven ability to architect and integrate backend services that handle high-volume transactions while ensuring security, fault tolerance, and system stability. At Krungsri Nimble, contributed to the architecture and development of a digital banking platform serving over 199K users, maintaining zero downtime and zero critical production incidents. Experienced in backend integration, distributed systems, and production reliability under mission-critical environments.

Education

King Mongkut's Institute of Technology Ladkrabang

May. 2011 – May 2015

Bachelor of Engineering (B.Eng.) Software Engineering (International Program)

Bangkok, Thailand

Key achievements

- Supported digital banking platform serving **199K+ users and 37K+ monthly active clients**.
- Achieved zero downtime and zero P1/P2 incidents in production during 2025.
- Built enterprise financial systems supporting **28K+ clients**.
- Delivered mission-critical transaction services for banking operations.

Experience

Krungsri Nimble

Dec 2020 – Present

Senior Software Engineer

Bangkok, Thailand

- Designed and contributed to **backend architecture and microservices integration** for a large-scale digital banking platform.
- Built and supported systems serving **199K+ users and 37K+ monthly active clients**.
- Developed and integrated **high-volume financial transaction services** including transfers/swift transfer, QR payments, and payroll processing.
- Implemented **event-driven architecture patterns** to improve system scalability and fault tolerance.
- Collaborated on **secure backend integrations** supporting enterprise financial operations for **28K+ clients**.
- Achieved **zero downtime and zero P1/P2 incidents** in production during 2025.
- Worked closely with cross-functional teams to ensure **robust system design and production stability**.

KBTG

Jan 2019 – Nov 2020

Software Engineer

Bangkok, Thailand

- Developed **Credit Bureau Integration System (KCBS)** supporting both batch and real-time processing.
- Enabled seamless integration with National Credit Bureau (NCB) systems for loan approval workflows.
- Built **Income Verification Platform (KVI)** to automate borrower financial validation.
- Improved processing efficiency and accuracy for loan decision-making.
- Implemented data import, calculation rules, and reporting (Excel/PDF export).
- Managed production releases with **zero rollback incidents**.
- Established monitoring and incident handling processes to maintain system reliability.

Samart Comtech Co., Ltd.

Apr 2017 – Dec 2019

Software Engineer

Bangkok, Thailand

- Designed and developed **Contract Lifecycle Management System** for enterprise back-office operations.
- Built automated **multi-stage email notification workflows** for contract expiration tracking.
- Reduced manual workload through system automation and alerting mechanisms.
- Implemented **file attachment and contract tracking features**.
- Delivered **Excel-based reporting tools** to enhance operational visibility.

Augmentis (Thailand) Ltd.

Jun 2015 – Mar 2017

Software Engineer

Bangkok, Thailand

- Translated business requirements into scalable internal web applications.
- Developed enterprise solutions to streamline workflows and improve operational efficiency.
- Collaborated with stakeholders to deliver customized business systems.

Technical Skills

Languages: Python, Java, C#, TypeScript/JavaScript, HTML, CSS, SQL

Cloud & Infrastructure: AWS, Azure, CI/CD

Technologies/Frameworks: .Net Core, .Net Framework, Spring Boot, Docker, MS SQL, PostgreSQL, Git, Dynatrace, GitHub Copilot, Claude Code

Projects

Krungsri Biz Online / Krungsri Biz Mobile

- Mobile banking applications for SME and corporate clients.
- Delivered secure and scalable financial transaction capabilities.

CBDC Krungsri (Deprecated)

- Flutter-based application for Central Bank Digital Currency (CBDC) transactions.
- Wallet Share feature (Main/Sub wallet management).
- Auto Currency Conversion (CBDC → THB) at the end of the day.

KBank Credit Bureau System (KCBS)

- Supports National Credit Bureau (NCB) inquiries via both Batch and Online applications.
- Batch application is used for the Credit Review module.
- Online application is available on both Web and Windows platforms for new credit request modules.

KBank Verify Income (KVI)

- Web application for verifying borrowers' income to support credit decision-making.
- Supports statement data import from both KBank and non-KBank accounts.
- Calculates customer income based on predefined rules used in the bank's loan approval process.
- Allows exporting income summaries in Excel or PDF format.

Contract Alert System

- Web application for sending email alerts when contracts or documents are approaching their expiration dates, covering companies under SAMART Corporation.
- Supports multiple reminder schedules per document and allows file attachments for each contract record.

Certifications

- Azure Data Fundamentals | Microsoft Certified
- Google People Management Essentials
- AI Practitioner | AWS Certified
