About Me

Software Engineer with 7+ years of experience building and supporting enterprise digital banking systems. Strong background in C#/.NET, backend services, REST APIs, microservices, and system integration across complex banking workflows. Experienced in system design, application modernization, security, production troubleshooting, and technical impact analysis across interconnected services. Comfortable taking ownership of features from technical design and implementation through testing, deployment, and production support.

Education

King Mongkut's Institute of Technology Ladkrabang

May. 2011 – May 2015

Bachelor of Engineering (B.Eng.) Software Engineering (International Program)

Bangkok, Thailand

Technical Skills

Languages: Python, Java, C#, TypeScript/JavaScript, HTML, CSS, SQL

Cloud & Infrastructure: AWS, Azure, CI/CD

Technologies/Frameworks: .Net Core, .Net Framework, Spring Boot, React, Flutter, Docker, MS SQL, PostgreSQL, Git, Dynatrace

Experience

Krungsri Nimble

Dec 2020 – Present

Senior Software Engineer

Bangkok, Thailand

- Developed and enhanced enterprise **digital banking platforms** covering fund transfers, bill payments, account statements, lending, PromptPay/QR payments, transaction-limit management, cardless transactions, and international SWIFT transfers.
- Designed and implemented **C#/.NET backend services, microservices, and REST APIs**, integrating multiple internal banking systems, databases, shared services, and downstream applications across complex transaction flows.
- Contributed to the **modernization of the mobile banking application from Xamarin to Flutter**, implementing and maintaining key banking journeys including authentication, account management, scheduled transfers, loan information, transaction limits, and related automated tests.
- Designed and implemented **international transfer capabilities supporting SWIFT and SEPA-related flows**, including beneficiary management, exchange-rate processing, transfer fees, pending transactions, approval workflows, reference-data integration, and dual-control processes.
- Developed **background services and batch-processing solutions** for customer profiling, data processing, migration, and transaction workflows, incorporating retry handling, processing-status tracking, database procedures, CDC-based processing, and resilience mechanisms.
- Investigated and resolved **production incidents across critical digital banking journeys**, identifying root causes and implementing improvements to validation, error handling, retries, logging, and service integration reliability.
- Performed **technical impact analysis across interconnected systems** and supported API evolution, legacy-service migration, service deprecation, application health checks, database integration, and configuration across multiple environments.

KBTG

Jan 2019 – Nov 2020

Software Engineer

Bangkok, Thailand

- Developed and owned the **Credit Bureau Integration System (KCBS)** and **Income Verification Platform (KVI)** web applications for the Loan Origination department, supporting both batch and real-time National Credit Bureau (NCB) integration for loan approval workflows.
- Prepared **release packages and deployment artifacts**, and led production deployment activities to ensure smooth, zero-rollback releases.
- Acted as **Site Reliability Engineer (SRE)** for both systems, owning end-to-end incident management under a *"you build it, you run it"* model, from detection and root-cause analysis through remediation and monitoring improvements.
- Improved processing efficiency and accuracy for loan decision-making through automated borrower financial validation.

Samart Comtech Co., Ltd.

Apr 2017 – Dec 2019

Software Engineer

Bangkok, Thailand

- Designed and developed **Contract Lifecycle Management System** for enterprise back-office operations.
- Engineered automated **multi-stage email notification workflows** system for contract expiration tracking, reducing manual follow-ups by 95% and preventing missed deadlines.
- Delivered **Excel-based reporting tools** to enhance operational visibility.

Augmentis (Thailand) Ltd.

Jun 2015 – Mar 2017

Software Engineer

Bangkok, Thailand

- Translated business requirements into scalable internal web applications.
- Developed enterprise solutions to streamline workflows and improve operational efficiency.
- Collaborated with stakeholders to deliver customized business systems.

Certifications

- Azure Data Fundamentals | Microsoft Certified
- AWS Cloud Practitioner | AWS Certified
- AWS AI Practitioner | AWS Certified
- Google People Management Essentials
